

CASE STUDY

US IMMIGRATION

THE CASE

SKJ Juris provides legal support services to US Immigration attorneys ("the client"), with emphasis on the current legal status of their clients ("end client"). This includes their end client's legal rights, duties and obligations when living in and/or visiting the U.S., as well as the federally mandated requirements for entering and/or remaining in the U.S. SKJ Juris is approached by the client in numerous instances for providing support in drafting various petitions, appeals, and processing of visa and asylum applications for their end clients.

The Client sought SKJ's expertise to provide research and draft the Asylum application for its end client. Asylum cases are high priority cases, owing to the torture from the people/ Tribe/ Government of the end client's country of origin. The end client himself and sometimes, along with his family is living under the constant fear of attack and craves emancipation. In one such case, the end client feared persecution from his Tribe in Nigeria due to his position as the son of the high priest. The client was under a strict deadline to present the Country of Origin Information along with the background information exactly matching the problems faced by his end client.

THE CHALLENGES

There are numerous end clients from Nigeria seeking Asylum/ Refuge in United States and United Kingdom. Generally, the details regarding the background of the end, clients are common, and there are numerous cases to –

THE STRATEGY

The client carried out systematic research on investigating previous case laws concentrating specifically on the Youruba Tribe and the rituals followed by them, along with detailed reports providing evidence and berating on degrading human rights conditions in Nigeria. Following an exhaustive and meticulous approach, the relevant information was collected, and the Asylum draft was prepared.

THE RESULT

The client was happy with the work product and commended on the Research and Drafting and Communication skills of our team.
